

NextGen Theranostics: Imaging alphas and novel radioligands

Breakfast Symposium:

June 10, 2024, 6:45am - 7:45am EDT
Metro Toronto Convention Centre
Room 701A

Join us:

Join leading Molecular Imaging experts Dr. Geoffrey Johnson, MD, PhD, from the Mayo Clinic and Dr. Youngho Seo, PhD, from UCSF, as they explore the challenges of imaging potential future alpha-based therapies with traditional technology, and the potential for developing novel radioligands to facilitate innovative methodologies combining therapy and imaging.

We are excited to welcome our 2024 keynote speakers:

Dr. Geoffrey Johnson, MD, PhD
Enterprise Chair of Nuclear Medicine, Mayo Clinic
Founder and Chief Scientific Officer, Nucleus
RadioPharma

Dr. Youngho Seo, PhD.
Director of UCSF Physics Research Laboratory
Professor in the Department of Radiology
and Biomedical Imaging at UCSF, and in the
Department of Nuclear Engineering at UC,
Berkeley
